

## **NY 7 FROM I-87 TO I-787 OVERLAP: A487**

**Post 2014 Funding:** \$9.104 M Construction (NHS)

### **History:**

- This is a follow-up project to the \$5 million concrete repair performed in 2003 by NYSDOT. It was first programmed in the 2007-2012 TIP in an effort to continue planned maintenance needed to keep this pavement in good condition.
- With an average daily traffic of nearly 70,000 vehicles, this corridor should be considered one of Regional significance.

### **Status:**

- Minor rehab has been programmed for 2014 however the current pavement continues to perform well and the schedule for this rehabilitation will be revisited during the next NYSDOT Regional Program Update in 2011.
- The pavement is still rated 8 however there is some rutting in the climbing lanes that will ultimately need attention. Funding would be NHS or STP depending on availability.
