

**NYSDOT's Request for a UPWP Amendment for the SPR-Funded I-87/Route 9
Integrated Corridor Study**

NYSDOT was successful in securing \$500,000 in SPR funds for the Integrated Corridor Study, and the project was added to the 2008-10 UPWP. NYSDOT believe that there is value (related to resources, including staffing) to transfer partial funding allocated to this project, and the primary management responsibility of this project, from NYSDOT to CDTC staff. CDTC would hold the contract with the consultant team that is envisioned to perform many of the associated tasks within the scope (currently being developed) through the existing host agreement with CDTA. Similar to PL and STP, CDTC would be reimbursed for costs incurred from NYSDOT.

NYSDOT requests a UPWP revision transferring \$400,000 in SPR funds to CDTC for the I-87/Route 9 Integrated Corridor Study. NYSDOT will provide the match.
