Project Scope

The project includes construction of a roundabout at the Route 9W / Glenmont Road / Feura Bush Road intersection in the Town of Bethlehem. Beyond the intersection, the project will include:

- Sidewalks around the perimeter of the roundabout and crosswalks on all four legs. Rectangular Rapid Flash beacons (RRFB's) are proposed at the roundabout crosswalks.
- Sidewalks on the east side of Route 9W between Glenmont Road and Glenmont Elementary, and on the north side of Glenmont Road between Route 9W and Vagele lane.
- Two mid-block crossings will be located on Glenmont Road and will include RRFB's.
- Pedestrian signals and a new crosswalk will be added at the Route 9W/Bender Lane traffic signal.

The project has been slightly delayed from the original schedule due to the design approval, and the right-of-way acquisition processes both taking longer than anticipated. The original schedule anticipated construction authorization to occur in January 2020, however, construction authorization is contingent on the right-of-way process, and is now expected to occur in February or March 2020.
