

Task 2.30.2 Highway Condition Inventory City of Albany

To prepare for the biennial survey of Albany City-owned roads due in 2021, staff will implement several one-time enhancements to the database as requested by the City, prior to undertaking the biennial survey.

In 2021 the biennial survey of Albany City-owned roads will be carried out under the biennial contract with the City of Albany. Contract deliverables include pavement ratings, tables, charts and maps, as well as GIS files and a final report summarizing current and historical pavement condition.

All survey work will be completed by CDTC staff trained in the visual procedures developed and used by the New York State Department of Transportation, known as the Windshield Survey Method. This method rates pavements based on the frequency and severity of surface distress. All survey work will be conducted using CDTC's GIS & GPS platforms.

CDTC Resources	Consultant	Local Cash	Local In-Kind	Local Total	Other (See Tables)	Total
					\$24,175	\$24,175
