DESCRIPTION: Mill the existing asphalt surface a minimum of two (2) inches to remove the deteriorated roadway surface. Upon removal, an asphalt truing and leveling course will be applied to bring the surface of the existing pavement to the same transverse and longitudinal slope required for the finished pavement surface. After the truing and leveling course is applied, the final wearing course will be placed to provide a smooth traveling surface. Additional improvements proposed include ADA compliant curb ramp (6) installation, sidewalk replacement (15,000 SF), 1,500 feet of curb replacement/resetting, and striping including travel lanes to support a lane reduction configuration (road diet), eleven (11) new high visibility crosswalks along Madison Avenue, bike lane/shared lane delineations and associated signage.
